

CMS Asia Pacific Power

Audits / Inspections

CMS is ISO 9001 certified and a Recognised Service Facility (MLA073367), delivering end-to-end compliance support for surface and underground mining equipment with flameproof electrical systems—both in our accredited workshop and on-site via qualified field service technicians.

Our accredited team provides Code C and C1 inspections (including diesel machine compliance for surface and underground), third-party audits, and flameproof document audits for both mobile and fixed plant. We also support hazardous area obligations through flameproof enclosure engineering design and approval, electrical installation verification aligned to AS/NZS 60079.14, and intrinsically safe assessment and verification aligned to AS/NZS 60079.25, giving clients confidence in fit-for-service outcomes, audit readiness with safe ongoing operation.

Capability / Services

- Field service technicians (on-site inspections, audits, and compliance)
- Code C inspections
- C1 inspections (surface & underground; diesel machines)
- Third-party audits
- Flameproof document audits (mobile & fixed equipment)
